

# Precious Sample Prospecting With Precision

*A Roadmap for Successful Biospecimen Collections*

PRECISION  
for medicine

## Getting It Right the First Time

From feasibility assessment to specimen delivery, Precision ensures the right samples are collected on time and on target.

- IRB-ready
- Ethically sourced
- Matched to specifications
- Ready for downstream analysis

**Biomarker and Drug Discovery**

**MEDICAL IRC/EIC**

### Sample Collection

Rapid initiation of collections from our IRB-ready framework and internal donor network

### Site Processing

Ensure consistency of specimen acquisition and quality with kits featuring tailored reagents and instructions for collection and processing of samples

### Transportation

Precision logistics teams coordinate and maintain custody over sample shipping and delivery, ensuring receipt of samples in compliance with the biospecimen lifecycle

### Downstream Processing

Fully integrated specialty lab services and facilities for seamless processing, QC, and storage of samples

### Sample Analysis

Confidently develop and validate biomarker assays with integrated holistic solutions across a broad range of modalities and analytical techniques

**Analytical, Regulatory, and Clinical Validation**

## Proceed With Precision

Experience end-to-end integration from sample collection to commercial success.

- Global CRO
- Biospecimens
- Central Lab Services
- Specialty Labs
- Data Intelligence
- Regulatory Expertise
- Commercialization

No detours, no delays—keep your biomarker driven drug development on track with expertly designed protocols and services for prospective biospecimen collections
